## Specifications & Parameters of Blood coagulant

Packaging specifications: 1L/bottle, 5L/bottle

Appearance: white suspended liquid

Main ingredients: silica powder, thrombin, etc.

Properties: It has a light organic solvent smell, is non-toxic and harmless, and has the function of rapidly promoting blood reduction. No effect on clinical biochemical item testings.

Clotting time: 7-10 minutes for initial clotting, 15 minutes for complete clotting

PH value range: 5.0-7.0

Coagulation principle: Quickly activate coagulation factors in the blood, promote the generation of thromboplastin and fibrin filaments, accelerate the contraction of snowball clots, and achieve the purpose of rapid coagulation.

Validity period: one year

Storage conditions: The product should be stored in a clean, cool, ventilated and dry environment without corrosive gases.
