

Luminol sodium salt
powder

Parameter specification of luminol monosodium salt

Product name: 5-aminophthalic hydrazide monosodium salt

Packing specification: 25kg/barrel, 500g/bottle (other packing can also be customized and shall be communicated with the sales manager in advance)

CAS No.: 20666-12-0

Molecular weight: 201.16

Molecular formula: $C_8H_8N_3NaO_2$

Water solubility: soluble in water (50 mg/ml)

Purity: $\geq 99\%$

Appearance: white powder

Term of validity: two years

Storage conditions: Store in a dark, inert atmosphere at room temperature.

Reminder: If the product in the package absorbs moisture or has other peculiar smell, please do not use it after the shelf life.
