

sodium Heparin
powder

specifications of heparin sodium

Packing :10g/bottle,50g/bottle,500g/bottle

Appearance: white amorphous powder

Performance: odorless, easily soluble in water, easy to absorb moisture, stable at room temperature

Specific rotation: $\geq +45^\circ$

PH value range:6.0-8.0

Absorbance:260nm ≤ 0.10

Clearness of aqueous solution:640nm ≤ 0.018

Shelf life:3 years

Storage conditions: Store in a cool and dry place in a sealed and light-proof manner, and protect from damp.

Note: Heparin sodium is an acidic mucopolysaccharide containing sulfate group, which shall be stored at 0-4 ° C for 7 days after being prepared into solution.
